

Why you need eero for Business.

Benefits

Create a customized guest wifi experience.

Captive portal enables businesses to create a customized guest wifi experiences, with a branded login screen and branded colors.

Create up to four different networks.

Multiple SSIDs enable businesses to set up multiple networks. This allows companies to keep employee and business critical devices separate from the other connected devices, such as guest devices.

Set guest wifi usage limits.

Leverage custom controls to set bandwidth and session duration limits for guest wifi users.

Simple setup and easy to manage.

eero for Business is easy to setup and manage, even for non-technical users, with access to eero support to assist should any additional guidance be required.

Compliance included

Prompt users to accept guest wifi terms and conditions, and provide acceptable usage policies and privacy notices at login.

Reliable wifi that keeps you connected

eero Internet Backup keeps you connected even when your wired connection goes down. Leverage our business internet expertise to help keep your wifi running smoothly.
